

ENERGY TRANSITION PARTNERSHIP

Powering Prosperity and Enabling Sustainability in South East Asia

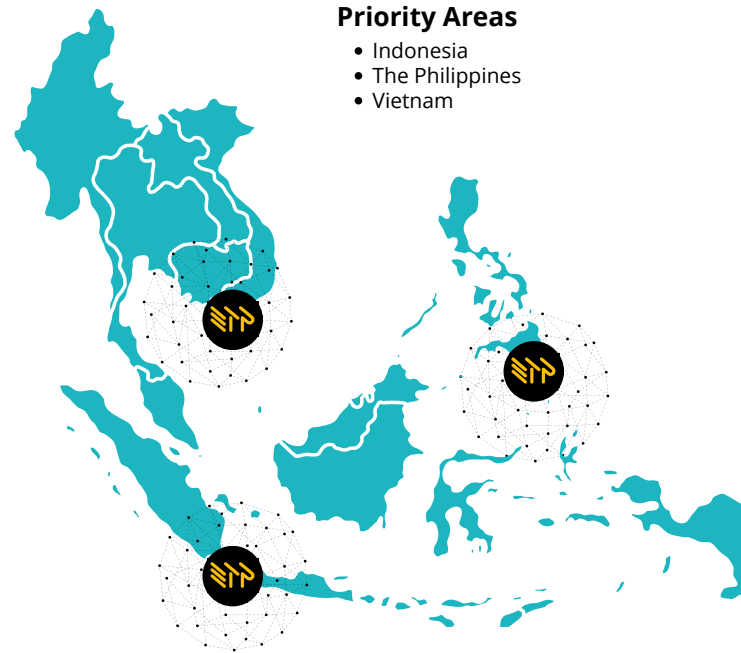

A multi-donor partnership of government and philanthropic funders, working to accelerate sustainable energy transition in Southeast Asia, in line with the Paris Agreement and Sustainable Development Goals.

What do we do?

The **ENERGY TRANSITION PARTNERSHIP** mobilizes and coordinates the necessary technical and financial resources to create an enabling environment for renewable energy, energy efficiency, and sustainable infrastructures to support the transition from using fossil fuels to renewable sources of energy to advance climate action in Southeast Asia.

Strategic Objectives

ETP partners with governments, private sector and civil society to harness the vast untapped potential of renewable energy into the energy mix in the Southeast Asian region. Through the design and delivery of technical assistance programs, aligned with ongoing programs in the region, **ETP provides technical expertise, coordination, dialogue and knowledge expansion to expedite energy transition, working across four strategic outcome areas:**

Priority Areas

- Indonesia
- The Philippines
- Vietnam

Aligning policies with climate commitments

Energy transition facilitation through policy, regulation and law

De-risking energy efficiency and renewable energy investments

Unlocking large-scale renewable energy investments by national & international financial institutions

Increasingly de-risking projects & making projects bankable

Extending Smart Grids

Technical solutions for expanding smart grids, enabling evidence-based planning for grid systems, and capacity building for grid operators

Knowledge, Awareness and Capacity-building

Embedding capacity building into each project to support knowledge transfer

Delivering technical and theoretical capacity building programs to policy makers, energy transition technicians and civil society
